

The lowest electricity burden in the EU?

A ministry claim, tested against Eurostat and the IMF

THE CLAIM

“...the burden on Maltese families is the lowest in the EU, at 14.33 PPS per 100kWh.”

Energy Ministry press release, 6 May 2025

For the second half of 2024, adjusted for purchasing power.

We checked every figure in the release.

VERDICT

LARGELY SUPPORTED

*Accurate figures;
the cost is left out.*

SUPPORTED

MAIN RESULTS

1st

Cheapest in purchasing power

14.35 PPS per 100 kWh, lowest of 27 EU countries (Eurostat).

3rd

Cheapest in euros

EUR 0.130 per kWh in late 2024, as stated.

−0.2%

Stable since 2020

The EU average rose 35% over the same period.

€1.0bn

Paid from public funds

IMF: energy subsidies 2022–2025 (electricity and fuel).

7.6%

Can't keep home warm

Below the EU's 8.8% (2025); bill arrears 4.5% vs 7.0%.

FAIR TO SAY

Low, stable prices protected households through the energy crisis. The release leaves out that taxpayers fund the difference.

WHAT WOULD SETTLE IT

☐ Electricity-only subsidy by year.

☐ Spending share by income group.

☐ Plans for targeted support.

☐ Cost-recovery tariff estimate.
