30,000 more hotel beds?

A news report, tested against Eurostat

THE CLAIM

> ***"Applications … include proposals for approximately 30,000 additional hotel beds."***

The Shift News, 29 August 2026

"The Shift is informed": no document, list or method published.

Applications validated before the new rules of 15 June 2026; hotels and extensions.

VERDICT

NOT SUBSTANTIATED

The sums hold, the 30,000 is not shown.

SUPPORTED | LARGELY SUPPORTED | **NOT SUBSTANTIATED** | MISLEADING | CONTRADICTED

MAIN RESULTS

30,000

Source not shown

An unnamed source. The MTA gave no figure and the Planning Authority did not reply, says the outlet.

7.67m

Guest nights: correct

30,000 beds × 365 nights × 70% occupancy reproduces The Shift's 7.7 million.

1.8–2.2m

Arrivals: correct, at full occupancy

Every bed full all year at 5–6 nights. At 70%, as for the nights: 1.3–1.5 million.

+52%

Large against today

Eurostat counts 58,099 bed-places in 2025. A wider measure than hotel beds.

4.6

Nights a stay

Non-residents stayed 4.6 nights per arrival at establishments in 2025 (assumed 5–6).

FAIR TO SAY

Other pipeline measures are of the same order (27,672 beds on the MTA list, April 2024), so the scale is plausible. Applications are not permits or built beds.

WHAT WOULD SETTLE IT

- ☐ The Planning Authority's count of validated hotel applications.
- ☐ Their beds, category, location and status.
- ☐ MTA compliance-certificate applications.
- ☐ The source of The Shift's figure.
