

Over 10 million airport passengers?

Malta International Airport's 2025 figure, tested against Eurostat

THE CLAIM

“...full-year traffic for 2025 up to 10,061,969 passenger movements, marking a 12.3% increase...”

Malta International Airport plc, company announcement 461/2026, 14 January 2026

Full-year traffic update to the Malta Stock Exchange.

A passenger movement is one arrival or one departure.

VERDICT

SUPPORTED

Independent statistics confirm the total and the growth.

MAIN RESULTS

10.07m

Eurostat, 2025

Passengers carried at Malta's airport:
0.09% above the company's
10,061,969.

+12.3%

Growth over 2024

From 8,968,239 passengers in 2024.
Both sources agree.

1st

Year above 10 million

Traffic was 7.3 million in 2019 and 7.8
million in 2023.

×2

Movements, not people

A return trip counts twice: roughly five
million round journeys.

9.3m

An outdated page

The company's Facts and Figures
page still shows its 2025 forecast.

FAIR TO SAY

The figure is accurate. Whether this
growth is sustainable is a different
question, asked in other checks.

WHAT WOULD SETTLE IT

☐ MIA: update the Facts and Figures page.

☐ Readers: movements are not travellers.

☐ See CC-030 on airport emissions.

☐ See CC-083–085 on tourism.
